

Catalogue of the Albert Hoxie Slide Collection

Compiled by Kent Fielding Schull
Summer 2001
Collection Owned by the Department of History, UCLA

Introduction

This catalogue is a guide to the contents of Albert Hoxie's entire slide collection of over 160,000 slides of art and architecture from all periods and from around the world. It is ordered according to his method of organization. There are three major sections. Section I is organized according to Area, Painter, and Time Period, for example: if you wish to see if the collection contains the works of Titian, look under Italian Painters 16th Century. Section II consists of artists and artistic works other than paintings and is organized according to Place, Subject Type, and Time Period,¹ therefore if you want the sculptural works of Michelangelo then look up under Italian Artists 16th Century. Section III consists of numerous slides taken of sites and architecture around the world. This section is organized according to country, town/city, and specific place.² For example if you want to see if the collection holds slides of Christ's Church College in Oxford, England; you would look under Central England, Oxford, Christ's Church, etc.³ It is also possible to search the collection by using the *binoculars* icon in the Adobe Acrobat Reader (assuming you have the PDF form of this document).

We strongly encourage faculty participation in the identification of slides. If you find an artist, area, or time period that is of interest and would like to use the slides or hasten the process of digitization, please contact Kent Schull: Hoxie@history.ucla.edu.

Disclaimer: there are many spelling errors in this catalogue due to the poor handwriting on many of the slides. I neither had the time nor the energy to research every name and place to ensure proper spelling. Therefore, the spelling of specific artists or places may vary according to standardized norms and require patience in locating it. It is often difficult to distinguish between Albert Hoxie's letter k and h; u and n; r and e; i and e; and j, z, g, y, and q. Your understanding is appreciated and corrections are encouraged, please use the above contact information. Also, not every site contained in the collection is listed in the catalogue. Albert Hoxie, at times, only listed the country and town/city visited and not every specific place within that town/city. Therefore, if you are interested in a specific site, such as the Blue Mosque in Istanbul, but it is not listed in the catalogue under Istanbul, it may still be in the collection. If this occurs please contact me and I can make a specific physical collection search.

Kent Fielding Schull, curator
The Albert Hoxie Slide Collection
Department of History, UCLA

¹ In many cases there is no time period but simply labeled as Indian Art or Chinese Art, etc..

² In some cases the slides were taken at a time when several of the countries were known by different names. As a matter of consistency I have kept the country names Albert Hoxie used, for example Czechoslovakia, Yugoslavia, etc.

³ In some cases, depending on the number of slides, Albert Hoxie divided countries into areas such as North and South France or North, Central, and South England. Rome has so many slides that it possesses its own subsection in Section III.

Table of Contents

Section I: Paintings	pp. 1-108
Pre-Historic	p. 1
Egypt- Pharonic	p. 1
Egypt- Fayum	p. 1
Near Eastern	p. 1
